Caring for your ScreenGuard Security Door

Your new ScreenGuard Stainless Steel Security Door / s have been manufactured using the highest quality materials available to the screen door industry. Constructed from Architectural Grade Aluminum and 316 Marine Grade Stainless Steel Mesh , both of these materials are highly corrosion resistant and exceptionally strong. With a moderate amount of maintenance, your ScreenGuard Security Door will be retained and resist the elements for years to come.

ScreenGuard Security Doors are designed to resist corrosion and rusting, but as with all external fixtures on your home, they require some maintenance to keep performing well. Depending on how harsh the environmental elements are, the maintenance period will vary. – Refer below

Your ScreenGuard Security Door should only ever need to be washed down with a soft bristled brush using warm water and mild detergent. Rinse well with fresh water to remove any detergent residue. Care should be taken to avoid excessive amounts of water entering the main lock and and auxiliary 3 point lock – if applicable.

Strong detergents and abrasive cleaners should never be used to clean your ScreenGuard Screens as these may scratch or damage the surface finish.

Periodic lubrication the main lock and auxiliary lock components should only ever be done using graphite powder. Liquid or aerosol can cause corrosion and damage the locking mechanism.

Suggested Maintenance Period Table:

Environment	Recommended Max Maintenance Interval
Mild	Six Months
Moderate	Three Month
Tropical / Severe	Two to Four Weeks

Environmental Definitions

Mild – Being rural, away from the coast and remote from industry and urban activity

Moderate – Being mainly urban, inland and away from heavy industry

Tropical / Severe – Being coastal / marine, subject to salt deposition and within 15km off the Ocean /

Warranty Information

Under the normal conditions of use in a residential – non commercial application, Canon Doors warrant for a period of 10 Years from the date of installation, the Aluminum Framing and Stainless SteelMesh products to be free of defects in manufacturing and workmanship when fabricated and installed.

As with any valued purchase, effective maintenance is essential to prolonging the life of your Galvanised Security products. To maintain your rights as stated in this warranty, the care and maintenance instructions stated above this warranty should be followed.

Any adjustment or re-alignment from installation after two weeks will incur a service call / charge.
