SCRENGUARD™

protect your view

Security with Style

Passed the latest rigid Australian
Standards AS 5039-2003

**Corrosion
Resistant**

316 grade stainless steel mesh

SCRENGUARD® stainless steel mesh security system was designed to protect your view and it does just that.

SCRENGUARD® systems have been put to the test and pass the latest rigid Australian Standards AS 5039-2003. These tests are designed to simulate an intense attack using force to gain entry through your security screen door or window.

SCRENGUARD® systems protect beautifully. No longer do you need to look at ugly grills, bars or similar obstructions that spoil your view. Take advantage of woven stainless steel mesh protection and enjoy the finest in security screens.

SCRENGUARD® aluminium frames are leading the way by using T6 grade, high tensile extruded aluminium, this ensures strength and quality. The aluminium is superbly finished using state of the art Australian equipment.

The anti corrosive stainless steel wire mesh is coated with a UV protected coating using advanced coating processes to ensure clear, long lasting looks.

Specially engineered PVC strips insulate the two metals within the frame and contribute to the sleek overall appearance of SCRENGUARD® products.

SCRENGUARD® Product Warranty is for 10 years from the date the product was installed. This warranty is to the original purchaser providing always that the product care and maintenance recommendations along with the following warranty conditions have been complied with during that period.
