## **Caring for your Steel Screen Door**

Your new Steel screen Door / s have been manufactured using the highest quality materials available to the screen door industry. Constructed from high grade steel tube, welded and finished to a professional standard then zinc plated to give maximum protection and finally powder coated to Australian standards , Whether you have tuff, one way mesh, Galvanized or stainless steel mesh all of these meshes require maintenance as well as your steel door to keep it in optimum condition. With a moderate amount of maintenance, your Steel screen door will be retained and resist the elements for years to come.

Steel screen Doors are designed to resist corrosion and rusting, but as with all external fixtures on your home, they require some maintenance to keep performing well. Depending on how harsh the environmental elements are, the maintenance period will vary. – Refer below

Your Steel screen door should only ever need to be washed down with a soft bristled brush using warm water and mild detergent. Rinse well with fresh water to remove any detergent residue. Care should be taken to avoid excessive amounts of water entering the main lock and auxiliary 3 point lock – if applicable.

Strong detergents and abrasive cleaners should never be used to clean your Steel screen door as these may scratch or damage the surface finish.

Periodic lubrication the main lock and auxiliary lock components should only ever be done using graphite powder. Liquid or aerosol can cause corrosion and damage the locking mechanism.

### **Suggested Maintenance Period Table:**

<b>Environment</b>	<b>Recommended Max Maintenance Interval</b>
Mild	Six Months
Moderate	Three Month
Tropical / Severe	Two to Four Weeks

### **Environmental Definitions**

Mild – Being rural, away from the coast and remote from industry and urban activity

Moderate – Being mainly urban, inland and away from heavy industry

Tropical / Severe – Being coastal / marine, subject to salt deposition and within 15km off the Ocean /

### **Warranty Information**

Under the normal conditions of use in a residential – noncommercial application, Canon Doors warrant for a period of 1 Years from the date of installation, the Aluminum Framing and Stainless SteelMesh products to be free of defects in manufacturing and workmanship when fabricated and installed.

As with any valued purchase, effective maintenance is essential to prolonging the life of your products. To maintain your rights as stated in this warranty, the care and maintenance instructions stated above this warranty should be followed.

Any adjustment or re-alignment from installation after two weeks will incur a service call / charge.
